

Product: Complete Dock Solution and Rolling Steel Door

Industry: Food Distribution

Application: Cave Cold Storage Facility

CASE STUDY

Dock Equipment

Large Food Storage Facility Expands By Adding 50 Docks

A food storage facility located in an underground storage system was being built and needed 50 new dock openings.

Before

PROBLEM

A large new construction project involved adding 50 loading docks to a cave storage facility focused on food service. The caves offered the customer a unique cold storage facility.

SOLUTION

DH Pace worked with the contractor to deliver specs for the construction of the facility. Once built, the team installed 50 new turnkey dock systems that included not only all the traditional dock elements, but also 50 rolling steel doors.

After

CONCLUSION

DH Pace has the ability to conveniently bundle various products together in new construction or even retrofit projects.
