

Product: Custom Wood Carriage House Garage Door

Industry: Residential

Application: Custom Garage

CASE STUDY

Residential

Custom Wood Door Frames New Storage Space

A customer was interested in creating a garage entrance into their basement.

PROBLEM

In order to do this project, it would require to create an opening from scratch in an existing home foundation.

SOLUTION

DH Pace worked with the contractor to ensure the basement foundation wall was cut to specifications. Then the team built a custom Ranch House Collection Wood Carriage House Style door that matched the home's entry door.

The new 10 foot by 7 foot opening into the new garage space gave the customer access to an inside storage space for the homeowner's equipment.

CONCLUSION

Custom solutions come in many shapes and sizes. Building solutions that match customer needs is always our goal.
